USE ONTAKT TO IDENTIFY AND JUSTIFY AUTOMATION

OnTakt's real-time data increases the productivity of your shop by reducing machine downtime. Capturing all of your production data over time also allows you to historically review performance and highlight opportunities to add additional automation or equipment to get more out of your existing machines. Looking for patterns in historical data can lead to rapid ROIs for machines with poor run quality or that require significant manpower to run. OnTakt makes it easy to access historical data to define automation projects and provide the data necessary to calculate the ROI for an improvement to your shop.

ONTAKT ADDING AUTOMATION

GAPS IN PRODUCTION WHEN OPERATOR IS UNAVAILABLE

MACHINE DOES NOT RUN OVERNIGHT

STEADY PRODUCTION REQUIRES 100% OPERATOR ATTENTION

COST SAVINGS

ESTIMATED SAVINGS:

$76,725 COST OF AUTOMATION

75% REDUCED OPERATOR ATTENDANCE AT MACHINE

2x THROUGHPUT OF A $75 PART

ROI:

1 MONTH

USE HISTORICAL DATA to identify opportunities to leverage automation to increase production efficiency

JUSTIFY NEW EQUIPMENT by using production data to perform ROI calculations
